INTERNSHIP

BETTER TOMORROW –MERN STACK INTERNSHIP–2025

Completed a comprehensive internship program focused on building full-stack web applications using the MERN stack (MongoDB, Express.js, React.js and Node.js). Gained hands-on experience developing RESTful APIs, creating dynamic front end interfaces and integrating backend services with databases.

ALGOTUTOR –MODERN FULL STACK WEB DEVELOPMENT INTERNSHIP–2025

Developed a movie blog web app using Next.js (App Router) with dynamic group routing and role-based authentication via NextAuth.js, gaining hands-on experience in server/client component separation and authentication workflows.

PROJECTS

CGPA CALCULATOR	2024
Developed a console-based CGPA Calculator in C to compute GPA and CGPA using course credits and grades. Applied structured programming with user-defined functions, input validation, and grade-to-point mapping. Showcased strong C fundamentals including loops, arrays, conditionals, and formatted I/O.	
Swiggy Clone (MERN Stack)	2025
Built a full-stack Swiggy Clone using MERN stack with features like user authentication, restaurant listings, cart, and order tracking. Designed MongoDB schemas, developed secure RESTful APIs, and integrated a responsive React frontend with real-time cart updates, order history, and dynamic filtering
